PRODUCT DETAILED DESCRIPTION Traditional desktop systems use additional discrete graphics cards to power multiple displays. To lighten the load, the BVU160 USB display adapter provides significant benefits and energy conservation.

- A USB graphics solution such as the BVU160 uses 80% less power than a discrete solution
- Employees using multiple displays more than 50% more productive than those using a single display
- Now, with USB graphics technology, notebooks are just as effective and easy to use with multiple displays as dedicated PCs.
