

# VStream™

Wireless HDMI Sender / Receiver  
VS200VR

The Diamond V-Stream HDMI Wireless AV Video Sender/ Receiver is compatible with almost any HDMI enabled cable/Satellite set-top box, Media Streaming box, Blu-ray/ DVD player and Gaming consoles. With the Diamond V-Stream, you can wirelessly stream video and turn any location in the home to an entertainment spot such as your outdoor patio, garage, bedroom, home office or kitchen without having to move or purchase additional set-top boxes, media players or gaming consoles. With built-in IR, you have full control over your HDMI devices wirelessly. In addition, the Diamond V-Stream also allows users to plug in USB game pads, mice and keyboards for full control over a PC/Media server

## Product Features and Information

---

- **Wirelessly transmit video from any HDMI source such as HD set top box, HD gaming console or any other HD HDMI enabled source to a HDTV or Projector**
- **Supports up to 1080P@30fps and or 720P@60fps**
- **Wi-Fi coverage up to 500ft (Clear Line of Sight).** *(For the best performance and coverage, we recommend the TX and the RX have a clear line of sight and not to install the TX/RX behind the TV or in/behind metal or cement walls. The VS200VR is capable of transmitting through walls but distance and performance is affected by environmental conditions as any WiFi device is)*
- **VR support for VR enabled smartphone (Requires VR smartphone headset)**
- **Wireless transmit video from any HDMI enables source to your Tablet/Smartphone with free TX app for Android and iOS.**
- **LED Connection status**
- **On-Device USB port for PC/Console control with mouse/keyboard**
- **NO-Lag, 16ms End-to-End Latency**
- **802.11 b/g/n Wi-Fi 2.4GH (Proprietary Channel 14 to ensure limited interference from neighboring Wi-Fi signals)**
- **Supported Video Formats: 1080i/1080P/720P/576P/480P**
- **Auto Configuration for easy use and setup**
- **IR: 20~60KHz**
- **High performance detachable external antenna (5dBi)**
- **Power Supply: 5V DC 2.5A**
