

USB-C Triple Display Mini-Docking Station

UD300C

Diamond UltraDock USB-C Triple Display Mini-MST Docking Station - UD300C

This new, compact, yet powerful, Docking Station allows you to use one single connection from your computer to connect up to 3 additional high-resolution monitors as well as a host of USB devices. It also includes a Gigabit Ethernet port. Its compact design makes it travel friendly, use at home and at the office.

Triple Display and Universal Connectivity

Expand your view by giving yourself more screen real-estate. Connect up to 3 additional monitors as well as all of your USB devices. The Diamond Triple Display Mini-Docking Station lets you mirror or extend your screen. This allows visibility of more applications simultaneously.

Power Delivery Charging Technology

With Power Delivery Charging technology, the Diamond Mini-Docking Station allows an upstream charging function through the Thunderbolt interface. Features data transfer speed up to 5Gbps and supports USB Power Delivery, allowing you to charge your computer while using the hub simultaneously.
