The manufacturer does not make any representations or warranties (implied or otherwise) regarding the accuracy and completeness of this document and shall in no event be liable for any loss of profit or any commercial damage, including but not limited to special, incidental, consequential, or other damage.

#### WEEE Directive & Product Disposal

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.

01

#### Introduction

This dock is built in slim, light and miniature case, it is designed to meet more demands of extra USB peripherals and monitors. To extend or duplicate the content of your AV sources, you can select either DP or HDMI port for display of high resolution.

In addition, you can also connect your laptop to the upstream USB-C port and get it charged. The dock also provides you three USB 3.0 interfaces so as to enable you to enjoy high speed data transfer.

#### Feature

##### USB Power Delivery

The upstream USB-C port is compliant with USB power delivery specification revision 3.0 and supports up to 65W power supply.

##### USB data transmission

The MST dock has three USB 3.0 ports, providing your devices plenty of connection possibility with data transfer rate up to 5Gbps.

##### Triple display

This MST dock has 3 different video ports, you can either select one port or combine two or all three of them for your own need.

##### RJ45 Gigabit Ethernet

Gigabit Ethernet port provides high-speed network and is backward compatible with 10/100Mbps.

##### SD/TF Card Reader

Support Secure Digital™ v5.0 and SD v3.1 UHS-I. Support SD2.0 SDHC/SDXC (Capacity up to 2TB).

02

#### Overview

- 1 Gigabit Ethernet port
- 2 2 x DisplayPort
- 3 Upstream USB-C port
- 4 1 x HDMI Port
- 5 Power port

- 1 Power button
- 2 USB 3.0 port with BC 1.2 fast charging
- 3 Micro SD card reader
- 4 SD card reader
- 5 4-pole phone jack

#### System Requirement

- Windows 7/8/10 or later
- Mac OS X or later
- CPU i7 or higher, RAM 4GB or above
- Requires that host PC/laptop supports PD 2.0
- PC/laptop with USB 3.1 full function Type-C port (Power Delivery, Video Alternate, Display)

03

#### Single Display

Video Port	DP	DP	HDMI
DP version of PC/laptop	DP 1.2	3840 x 2160/30Hz	3840 x 2160/30Hz
	2560 x 1440/60Hz	2560 x 1440/60Hz	2560 x 1440/60Hz
DP 1.3	3840 x 2160/60Hz	3840 x 2160/60Hz	3840 x 2160/60Hz
MacOS	Mirror	✓	✓

04

#### Installation

Before using this dock, please make sure that the latest PC/laptop drivers are installed (including USB, graphics card etc) because the network port needs specific drivers. For **Windows 10**, the system detects and automatically installs them after the dock is connected to the network. If drivers cannot be automatically installed, the network port can't perform properly. Please install them manually.

1. The dock is driver free, therefore you don't need to install any driver before using it.
2. Connect the USB-C connector of the dock to your host Laptop/PC, the LED light on the dock will turn blue.
3. Connect your monitor(s) to video ports of the dock then you can proceed to configure the display modes.
4. Plug the power adapter of the dock in a power outlet.

##### Remarks for Windows based PC/laptops:

1. Before you connect two or three monitors, we suggest you lower monitor resolution, please check **Q3** for details.
2. Before you connect three monitors, we suggest you disconnect PC/laptop first, please check **Q2** for details.

##### Remarks for Mac based PC/laptops:

1. When you connect only one external monitor to the dock, the extend and duplicate modes are both available.
2. If you have two or three monitors connected to the dock, then you can only extend to one monitor while the other one or two monitors will copy the same content on your extended monitor.

05

#### Display Mode Setting

##### For Windows Users

1. Right click at any spot on your desktop and select "Display settings".

2. In "Display", please select either monitor 1 or monitor 2.

06

3. Scroll down to the "Multiple displays", and select the mode in the drop-down list that is fit for your need.

##### For MacOS Users

1. Select "System Preferences" and choose "Displays".

07

2. Click on "Arrangement" to change the position of displays currently connected.

3. Select either extend or mirror mode on your demand.

Mirror Mode

08

#### Q & A

##### Q1. How to figure out the maximum resolution (DP1.2/DP1.4) my laptop supports?

- A1. 1. Firstly check the Graphics card version of your laptop; "Find "display adapter" in "Device Manager".  
2. Check the information of Intel processors for details <https://www.intel.com/content/www/us/en/support/products/80939/graphics-drivers.html>

##### Q2. Why doesn't my third monitor display when I set the triple display mode?

- A2. Step 1: Choose the main display  
1. Right-click to select "Display settings".  
2. Choose a monitor display and scroll down to "Multiple displays".

3. Mark "Make this my main display".

09

##### Step 2: Disconnect laptop display

1. Select the laptop display ("1" is the default display for laptop) and scroll down to "Multiple displays".
2. Select "Disconnect this display", then laptop display panel will become disconnected.

##### Step 3: Turn on the third monitor display

1. Choose the remaining monitor display then scroll down to "Multiple displays".
2. Select "Extend desktop to this display" to enable this display.

10

##### Q3: Why are my 2K and 4K monitor display abnormal when I set dual or triple display mode?

- A3. The resolution of some branded monitors cannot be adjusted automatically, the "Active signal resolution" of which is different from Windows setting "Desktop resolution", hence you better set the resolution at the same value.  
1. Right-click and select "Display settings".  
2. Select your monitor display and click on it, then scroll down to select "advanced settings".

3. Check if resolution values of each monitor on "Desktop resolution" and "Active signal resolution" are the same.

11

4. Click on "Display adapter properties for Display 2" and lower the resolution to the right value if two values are different.

##### Q4. Why does it show "slow charging" on my laptop?

- A4. Some users may notice that the charging status shows "slow charging", this is because some series of laptop have protection protocol, especially laptops that have both Thunderbolt 3 port and over 100W external DC power adapter. Please solve it by using laptop provided external power adapter to charge.

12

##### Q5. What is High Dynamic Range (HDR)?

A5. High Dynamic Range (HDR) creates much more lifelike experiences by allowing bright objects such as lights and highlights glinting off shiny objects to be displayed much more brightly than other objects in the scene. HDR also allows for more details in dark scenes. True HDR playback is not yet available on the built-in displays of laptops and tablets, many of TVs and PC monitors start to build in HDR-10 with HDCP2.2 to supporting. Some of the key HDR content sources today are.

- Streaming HDR (eg. YouTube\*) & Streaming premium HDR (eg. Netflix\*)
- Local HDR Video Files
- ULTRA HD Blu-ray\*
- HDR games//
- HDR content creation apps

Also, if you need to stream HDR contents with applications like Netflix and YouTube, make sure in Windows 10 "Stream HDR Video" setting is "on" in the 'Video playback' settings page.
